WORK EXPERIENCE

• Valeo

DevOps Engineer (SDE)

Cairo, Egypt

Jan 2025 – Present

- Developed robust Jenkins CI/CD pipelines to orchestrate regulatory-compliant checks (e.g., ASPICE/ISO), ensuring high-reliability validation standards.
- Implemented internal tools in Python and Go to streamline team workflows, reducing manual task execution time by 40% and improving developer productivity across the organization.
- Developed custom reporting tools to aggregate QA data within Jenkins, reducing report analysis time for developers and leadership by over 60%.
- Instrumented existing Jenkins pipelines with custom Python/Go logging hooks to stream telemetry data to Google BigQuery, designing real-time dashboards that reduced bottleneck identification time by over 60%.
- Engineered modular Ansible roles to automate tool provisioning across 800+ remote machines, achieving 100% configuration parity and eliminating manual drift across diverse environments.
- Executed major migrations impacting 2,000+ repositories, while ensuring a seamless transition for the development team.

• Valeo

Embedded HiL Testing Engineer

Cairo, Egypt

Aug 2022 – Jan 2025

- Developed and executed HiL validation test cases for DC-DC converters and OBCs for major automotive clients including Ford, BMW, and Daimler, using dSPACE and Vector CANoe.
- Identified, documented, and tracked system-level bugs using Polarion ALM, collaborating with development teams to ensure timely resolution and verification of fixes.
- Analyzed system and software requirements to create and update test specifications, enhancing test coverage and validation effectiveness for new product features.
- Reduced bug resolution time by 40% through direct collaboration with developers.

EDUCATION

• Georgia Institute of Technology

Master of Science in Computer Science

Atlanta, GA

Expected Fall 2028

• Misr International University

B.Sc. in Electronics and Communication Engineering – Cum. GPA: 3.59

Cairo, Egypt

Graduated July 2022

- **Graduation Project:** Led the design and implementation of a satellite communication system, developing communication management software using AX.25 and SSP protocols.

SKILLS

- **DevOps & Automation:** Jenkins, AWS, Ansible, CI/CD, Docker, Kubernetes, Git
- **Programming Languages:** Python, Go, C

CERTIFICATIONS & COURSES

- **Full Embedded Systems Diploma:** Covered C programming, Data Structures, AVR microcontrollers, RTOS, and Embedded Software Engineering Principles (Oct 2021).
- **Satellite Communication Subsystem Course:** Implemented the AX.25 protocol in LabVIEW and built a wireless data transmission system using Arduino and nRF modules (Sept 2021).
